## **Retrieval of MTR Data via XML**

Meter Service Providers (MSPs) and Metered Market Participants (MMPs) have been requesting an alternate facility to download MTR data to supplement their current practice of using only the Meter Trouble Report (MTR) workflow program. This request was initially registered as a Participant Issue Log # 206 and was addressed by a MTR Working Group consisting of MSP and MMP representation from the Revenue Metering Sub-Committee (RMSC).

In an effort to make the XML data retrieval facility available by early October 2004, we are requesting that the MTR Working Group, Revenue Metering Sub-Committee and the Commercial Reconciliation Sub-Committee submit their comments on the proposal by Wednesday, August 4, 2004.

To help you understand the new proposal, the presentation below provides you with a sample MTR Update Report in XML and its associated XSD schema. Although two methods of data retrieval will be provided, a simulated example of retrieving the MTR Update Report in XML format from the IMO Reports Web site is provided below along with examples of how the XML report can be imported into MS Excel 2003 and MS Access 2003.

- [Proposed New MTR Update Report](#)
- [Sample MTR Update Report](#) (XML)
- [Sample XSD Schema for MTR Update Report](#) (XSD)

Should you have any comments, questions or concerns, please forward them by e-mail to [tuire.pickering@theIMO.com](mailto:tuire.pickering@theIMO.com) and [victor.wong@theIMO.com](mailto:victor.wong@theIMO.com) by July 30, 2004 or contact Tuire Pickering at (905) 855-6492.

Thank you for your cooperation.

Victor Wong  
IMO Settlement Support Manager
