Re: Action Items 47-2 and 49-1

AI 47-2

IESO to investigate feasibility of providing stakeholders with pre-dispatch and forecast real-time domestic supply cushion.

IESO action

In late August 2008, the IESO started publishing pre-dispatch and forecast real-time supply cushion information as part of the Adequacy Report. This report which can be found on the IESO public web site at the following location:

<http://www.ieso.ca/imoweb/marketdata/adequacy.asp>

Historical Adequacy Reports can be found on the IESO public web site at the following location:

<http://reports.ieso.ca/public/Adequacy/>

Recommendation

The IESO recommends that AI 47-2 be closed.

AI 49-1

IESO to determine what parts of the service level agreement between the IESO and the OPA related to the DR3 program could be made public.

IESO action

The IESO has approached the OPA regarding publication of portions of the service level agreement. The OPA has advised that any part of the service level agreement that the OPA decides to make public would be on the OPA website. The link to the DR3 program page on the OPA web site is:

<http://www.powerauthority.on.ca/Page.asp?PageID=924&SiteNodeID=314>

The DR3 program is an OPA program and decisions regarding publication of information related to the program are OPA decisions.

Recommendation

The IESO recommends that AI 49-1 be closed.

Yours truly,

John MacKenzie
