IESO SAC COMMITTEE MEETING

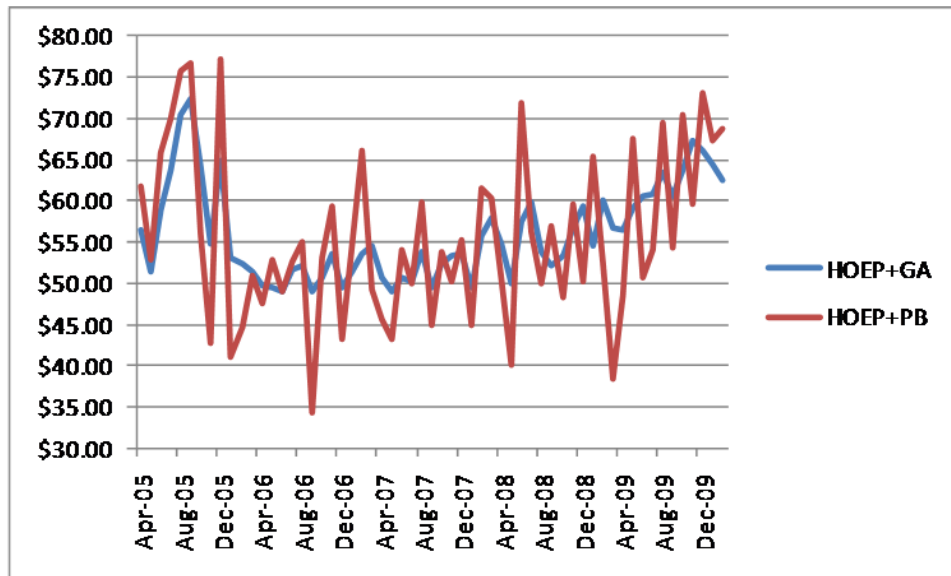

March-31-2010

IESO SAC Committee Meeting

Provincial Benefit

- Applies to retail consumers billed on HOEP
- Global Adjustment is delayed by 1 Month
- Results in a distortion of the effective prices

IESO SAC Committee Meeting

OPA CDM Program Delivery

- Certain commercial sector consumers have facilities across the province
- There is an interest in CDM programs
- Complexity in dealing with numerous LDC's makes the program less attractive.
- Prefer single program delivery agent for commercial chain accounts

IESO SAC Committee Meeting

Solar FIT Program/Roles & Responsibilities

Solar PV installations on commercial rooftops offer:

- Use of existing T&D infrastructure
- Relief of T&D infrastructure by generally being of a lesser capacity than the host electrical service
- General correlation with system needs: daytime, peak hour generation
- Require clarity around rules, roles & responsibilities
- Customer Impact Assessment (CIA) is required from HydroOne & LDC's as part of the OPA Solar FIT Program even though certain FIT submissions are supposed to be "Capacity Allocation Exempt"

IESO SAC Committee Meeting

Smart Meter Access

- Large retail energy consumers typically have interval meters - either as a code requirement or as a result of their own expenditure with the host LDC
- Meters are utilized routinely as part of demand response and monitoring & bench marking
- With the broad adoption of 'smart meters' some LDCs are employing new technologies, eg. Smart Synch meters
- Conventional access to meters (MV90 & pulse systems) are threatened
- LDCs must ensure that meter access is **not impaired** with the adoption of new smart meter technologies as applied to mid and large general service consumers

IESO SAC Committee Meeting

Future Role of IESO

- Historically, the IESO has demonstrated leadership and technical competence in numerous ways. (eg. Market Rules, TDR Program, Participant Training Programs, Stakeholder Consultations, etc).
- IESO is an effective conveyor of unbiased electricity sector information to the commercial sector
- This role is crucial to the commercial sector as the market evolves with the introduction of the Green Energy Act.
