Subject: Workshop Invitation - Preparing for Enhanced Day-Ahead Commitment Process (DACP) Participation

The IESO would like to invite market participants to a workshop to learn about what they need to do to participate in the enhanced Day-Ahead Commitment Process (DACP), which will be in-service this fall.

The workshop will be held on Friday, September 30, 2011, from 8:30 a.m. to 4 p.m. at the IESO's Mississauga offices. This will be of most interest to those who are participating in DACP and have not been involved in the various Enhanced Day-Ahead Commitment Project (EDAC) working groups. If there are others in your company who may be interested, please pass this invitation on to them.

The following topics will be covered in the workshop:

1. Overview of EDAC and impacts to market participants
2. Registration - changes to participant and facility registration requirements
3. Operations - new DACP rules, enhancements to the bid and offer application
4. Settlements - new and revised charge types and equations, revised settlements data file
5. Publishing and Reporting - new DACP public and private reports

To register, call 905-855-4142 or email marketplacetraining@ieso.ca.
