

MC - Update (1)

- HONI has advised MC has granted permission for the non-type approved ITs to be used until 31 Dec 2004.
- No indication what will happen after 2004
- MC has raised an issue over the sealing of meters and the contractor number.
- MC has designated HONI the transmitter as the temporary contractor in the wholesale market.

Update (2)

- The generators remain a contractor
- But who is the contractor for the balance of the market?
- The IMO's position is remains that it is not the contractor.
- MC wants to sort out the contractor issue first and then deal with the ITs etc.
