

MV-90 xi TCP/IP Communication Expansion

Revenue Metering Standing Committee
April 2rd, 2008

- Wholesale Metering Group (WMG) met with IT&I Group to discuss possibilities of allowing other *market participants* (MP) to make use of TCP/IP communications for wholesale metering.
- Various options were presented and discussed.
- The WMG needs to assess how MPs want to take advantage of this option.
- Hydro One Networks Inc. wants to increase TCP/IP communications to add another 500 meters. Our systems are capable of handling the volume.

- In May, we will begin discussions with the MSPs to see what needs to be done in order to allow them to register meters with TCP/IP communications.
